This impressive home has an array of special features, yet it's cost-effective and easy to build for those on a limited budget. Tray ceilings elevate the bedroom/study, dining room, and master bedroom. A bayed window illuminates the formal dining room. The great room features a cathedral ceiling and a striking fireplace. A smart angled counter is all that separates the great room, kitchen, and bayed breakfast area. The master bedroom suite remains a private getaway from the rest of the home. Note the tub, large separate shower, and double vanity.
